TECHNICAL DATA SHEET

Pralim industrial absorbent towel 29 cm x 29 cm - 100 units - Gray

Code: 898

Description

Produced from a needle-punched nonwoven, in which the web is consolidated by the mechanical interlacing of fibers, Pralim has a porous structure and a balanced textile composition to quickly absorb and retain any type of dirt or liquid. Pralim performs very well in oil absorption and grease cleaning.

Characteristics

Type	Industrial absorbent towel
Basis weight	180 g/m²
Temperature resistance	From -40° to +120°
Composition	Not determined

Contents and dimensions

Pack: 100 units. Each absorbent towel measures 29 cm x 29 cm.

Care instructions

For these reusable products, use is recommended until saturation is observed. The product must then be disposed of in an appropriate place and manner.

The product has high absorption capacity, which makes it effective for removing liquids in general together with dirt generated by industrial machinery and equipment. It is therefore suitable for use in printing facilities, mechanical repair shops, chemical industries, fuel stations and other settings.

Washing the product is not recommended. Depending on the volume to be disposed of, reverse logistics applies to this type of product.
